

General view of regeneration proposals

Foreword

We are delighted to introduce our proposals for the regeneration of Wornington Green.

We believe that this inner city estate and the surrounding neighbourhood is set for an exciting transformation. It will be a renaissance that will have a positive and lasting impact on the economic and social well-being of thousands of people living and working in the North Kensington area.

North Kensington is going through massive change. Our proposals are a major piece in the regeneration jigsaw, which will help the area become a truly mixed, vibrant and prosperous community.

It will be a confident and outward-facing new piece of city. The design will integrate well with the surrounding area and the quality of the architecture and materials will be breath-taking.

We want to see Wornington Green follow the historic street network of the Portobello Road, Golborne Road and Ladbrooke Grove area,

reconnected to the existing street markets and neighbourhood. This will reinforce the area's links with the wider area of North Kensington, Notting Hill and Westbourne Grove.

This document sets out our vision and provides an insight into the regeneration and why we are so positive about the benefits it will unlock for the wider area and the prosperity it will bring to so many. We hope you find it helpful in understanding how we have arrived at the masterplan. It is designed to give you a flavour of the regeneration.

The proposals have received considerable public support. We would like to thank everyone who has been involved in preparing the proposals and we look forward to your continued interest and support.

Manpreet Dillon
Managing Director, KHT
